### We're improving the electric system in your area

Dear City Of West Miami:

We have heard your concerns about the electric service to your neighborhood and want to assure you that we are working to enhance reliability in your area. Part of this effort includes proactively monitoring and making improvements to your service. Since January 2018, FPL has:

- Cleared vegetation from the main power line that serves your area;
- Cleared vegetation from the neighborhood power lines;
  - Between Southwest 62<sup>nd</sup> Avenue and 65<sup>th</sup> Avenue
  - Between Southwest 10<sup>th</sup> Street and Southwest 10<sup>th</sup> Terrace
- Completed visual and infrared inspections of the main power line and neighborhood power lines serving your area; and
- Added automated smart switches on the neighborhood power lines to help detect, mitigate and shorten the duration of outages.

Additionally, we have conducted a thorough review of your area's electric service and identified key potential issues related to vegetation growth, the number one cause of outages, on your main power line. FPL has consistently trimmed vegetation along the main power line for the past few years, however, trees and vegetation on private property coming into contact with power lines is still one of the leading causes of power outages and flickers. That is why it is important to keep power lines on your property clear of vegetation to ensure safe and reliable service. Please contact a qualified tree trimming service to safely perform this kind of maintenance work. Do not attempt to trim near power lines on your own and always stay at least 10 feet away.

We also recommend customers become familiar with our Right Tree/Right Place guidelines ([www.fpl.com/trees](http://www.fpl.com/trees)), which will help you select the right tree, plant it in the right place away from power lines and plan for future growth.

Finally, throughout the year, we will continue line clearing, conducting infrared inspections and installing more automated smart switches in your area. To see upgrades we have made within the last year, check our FPL System Improvements Map anytime by going to [www.fpl.com/maps](http://www.fpl.com/maps).

We thank you for your cooperation and look forward to continue serving you. If you have any questions, contact us at 305-599-4010.

Sincerely,

A handwritten signature in black ink that reads 'Robert Gaddis'.
