

ORDINANCE 2020-03

ORDINANCE OF THE CITY OF WEST MIAMI AMENDING CHAPTER 17 ARTICLE I "IN GENERAL" ADDING A NEW SECTION FOR FLORIDA-FRIENDLY FERTILIZER USE ON URBAN LANDSCAPES WITHIN THE CITY OF WEST MIAMI AS REQUIRED BY NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM FOR THE STATE OF FLORIDA COUNTY OF MIAMI DADE

WHEREAS: The City of West Miami sees fit to have a Florida Friendly Fertilizer Use Ordinance is another tool to reduce sources of nutrients coming from urban landscapes to reduce the impact of nutrients on Florida's surface and ground waters. Limiting the amount of fertilizer applied to the landscape will reduce the risk of nutrient enrichment of surface and ground waters, but effective nutrient management requires more comprehensive control measures. Such a comprehensive approach is needed that may include, but is not limited to, land planning and low-impact development, site plan design, landscape design, irrigation system design and maintenance, fertilizer application, landscape maintenance, and waste disposal. To assist local governments in improving their existing land development regulations, several "model" ordinances have been developed.

WHEREAS: "Low Impact Design" ordinances which seek to reduce the impact of urbanization on our natural resources by stressing "source controls" that either minimize the generation of stormwater or minimize the pollutants that can get into stormwater. For example, promoting development designs that minimizes clearing of natural vegetation and the compaction of urban soils. A Model Springs Protection Code was developed by DCA, DEP, and other stakeholders that includes specific Land Development Regulation recommendations that promote Low Impact Design. This Model Code is available as Chapter 5 in Protecting Florida's Springs: An Implementation Guidebook. It is available at: <http://www.dca.state.fl.us/fdcp/DCP/springs/index.cfm>.

WHEREAS: "Landscape Ordinances" because design, construction, and maintenance are major determinants in the amount of fertilizer and irrigation that is needed to maintain healthy urban landscapes and minimize adverse impacts on water resources. A model Landscape Ordinance entitled "Guidelines for Model Ordinance Language for Protection of Water Quality and Quantity Using Florida-Friendly Lawns and Landscapes" was developed by a group of agencies, industries, and interest groups over a two-year period and published in 2003. It was fundamentally an adaptation of earlier water conservation ordinances revised to include water quality protections for compliance with Total Maximum Daily Load (TMDL) or stormwater NPDES permit requirements. The language focused on continuing education of lawn care and landscape professionals, proper planning and supervision during development and construction, and the use of best management practices, including the Florida-Friendly Landscape Program. This model ordinance has been renamed "Florida-Friendly Landscaping™ Model Guidelines for Ordinance Language for Protection of Water Quality and Quantity," updated in 2008 and 2010 and may be downloaded from: <http://www.dep.state.fl.us/water/nonpoint/pubs.htm>.

WHEREAS: Finally, the 2004 Florida Legislature directed Florida's water management districts to work with interested parties to develop landscape irrigation and Florida-Friendly design standards for new construction (section 373.228, F.S.). Local governments are to use the standards and guidelines when developing landscape irrigation and Florida-Friendly ordinances. The Committee on Landscape Irrigation and Florida-Friendly Design Standards convened and developed the standards. They are published in a booklet called Landscape Irrigation and Florida-Friendly Design Standards (December 2006). The 2009 Legislature has directed that it be revised in 2011. The current version of this document can be downloaded from:

http://www.dep.state.fl.us/water/waterpolicy/land_irr.htm

NOW THEREFORE BE IT ORDAINED:

FINDINGS

As a result of impairment to City of West Miami surface waters caused by excessive nutrients, or, as a result of increasing levels of nitrogen in the surface and/or ground water within the aquifers or springs within the boundaries of City of West Miami, the governing body of the City of West Miami /Miami Dade County has determined that the use of fertilizers on lands within (City of West Miami creates a risk to contributing to adverse effects on surface and/or ground water. Accordingly, the governing board of the City of West Miami finds that management measures contained in the most recent edition of the "*Florida-Friendly Best Management Practices for Protection of Water Resources by the Green Industries, 2008,*" may be required by this ordinance.

1. PURPOSE AND INTENT

This Ordinance regulates the proper use of fertilizers by any applicator; requires proper training of Commercial and Institutional Fertilizer Applicators; establishes training and licensing requirements; establishes a Prohibited Application Period; specifies allowable fertilizer application rates and methods, fertilizer-free zones, low maintenance zones, and exemptions. The Ordinance requires the use of Best Management Practices which provide specific management guidelines to minimize negative secondary and cumulative environmental effects associated with the misuse of fertilizers. These secondary and cumulative effects have been observed in and on the City of West Miami natural and constructed stormwater conveyances, rivers, creeks, canals, springs, lakes, estuaries and other water bodies. Collectively, these water bodies are an asset critical to the environmental, recreational, cultural and economic well-being of the City of West Miami residents and the health of the public. Overgrowth of algae and vegetation hinder the effectiveness of flood attenuation provided by natural and constructed stormwater conveyances. Regulation of nutrients, including both phosphorus and nitrogen contained in fertilizer, will help improve and maintain water and habitat quality.

2. DEFINITIONS

For this Article, the following terms shall have the meanings set forth in this section unless the context clearly indicates otherwise.

“Administrator” means the the City of West Miami Administrator, or an administrative official of the City of West Miami government designated by the City of West Miami Administrator to administer and enforce the provisions of this Article.

“Application” or “Apply” means the actual physical deposit of fertilizer to turf or landscape plants.

“Applicator” means any Person who applies fertilizer on turf and/or landscape plants in the City of West Miami.

“Board or Governing Board” means the Board of City Commissioners of the City of West Miami, Florida.

“Best Management Practices” means turf and landscape practices or combination of practices based on research, field-testing, and expert review, determined to be the most effective and practicable on-location means, including economic and technological considerations, for improving water quality, conserving water supplies and protecting natural resources.

“Code Enforcement Officer, Official, or Inspector” means any designated employee or agent of the City of West Miami whose duty it is to enforce codes and ordinances enacted by the City of West Miami.

“Commercial Fertilizer Applicator”, except as provided in 482.1562(9) F.S., means any person who applies fertilizer for payment or other consideration to property not owned by the person or firm applying the fertilizer or the employer of the applicator.

“Fertilize,” “Fertilizing,” or “Fertilization” means the act of applying fertilizer to turf, specialized turf, or landscape plants.

“Fertilizer” means any substance or mixture of substances that contains one or more recognized plant nutrients and promotes plant growth, or controls soil acidity or alkalinity, or provides other soil enrichment, or provides other corrective measures to the soil.

“Guaranteed Analysis” means the percentage of plant nutrients or measures of neutralizing capability claimed to be present in a fertilizer.

“Institutional Applicator” means any person, other than a private, non-commercial or a Commercial Applicator (unless such definitions also apply under the circumstances), that applies fertilizer for the purpose of maintaining turf and/or landscape plants. Institutional Applicators shall include, but shall not be limited to, owners, managers or employees of public lands, schools, parks, religious institutions, utilities, industrial or business sites and any residential properties maintained in condominium and/or common ownership.

“Landscape Plant” means any native or exotic tree, shrub, or groundcover (excluding turf).

“Low Maintenance Zone” means an area a minimum of ten (10) feet wide adjacent to water courses which is planted and managed in order to minimize the need for fertilization, watering, mowing, etc.

“Person” means any natural person, business, corporation, limited liability company, partnership, limited partnership, association, club, organization, and/or any group of people acting as an organized entity.

“Prohibited Application Period” means the time period during which a Flood Watch or Warning, or a Tropical Storm Watch or Warning, or a Hurricane Watch or Warning is in effect for any portion of the City of West Miami, issued by the National Weather Service, or if heavy rain¹ is likely.

“The City of West Miami Approved Best Management Practices Training Program” means a training program approved per 403.9338 F.S., or any more stringent requirements set forth in this Article that includes the most current version of the Florida Department of Environmental Protection’s *“Florida-Friendly Best Management Practices for Protection of Water Resources by the Green Industries, 2008,”* as revised, and approved by the City of West Miami Administrator.

"Saturated soil" means a soil in which the voids are filled with water. Saturation does not require flow. For the purposes of this ordinance, soils shall be considered saturated if standing water is present or the pressure of a person standing on the soil causes the release of free water. [Guidance: Some have questioned the enforceability of practical field definitions which should be considered before adoption.]

“Slow Release,” “Controlled Release,” “Timed Release,” “Slowly Available,” or “Water Insoluble Nitrogen” means nitrogen in a form which delays its availability for plant uptake and use after application, or which extends its availability to the plant longer than a reference rapid or quick release product.

“Turf,” “Sod,” or “Lawn” means a piece of grass-covered soil held together by the roots of the grass.

"Urban landscape" means pervious areas on residential, commercial, industrial, institutional, highway rights-of-way, or other nonagricultural lands that are planted with turf or horticultural plants. For the purposes of this section, agriculture has the same meaning as in s. 570.02.

3. APPLICABILITY

This Ordinance shall be applicable to and shall regulate any and all applicators of fertilizer and areas of application of fertilizer within the area of the City of West Miami, unless such applicator is specifically exempted by the terms of this Ordinance from the regulatory provisions of this Ordinance. This Ordinance shall be prospective only, and shall not impair any existing contracts.

4. TIMING OF FERTILIZER APPLICATION

No applicator shall apply fertilizers containing nitrogen and/or phosphorus to turf and/or landscape plants during the Prohibited Application Period, or to saturated soils.

5. FERTILIZER FREE ZONES

Fertilizer shall not be applied within ten (10) feet of any pond, stream, watercourse, lake, canal, or wetland as defined by the Florida Department of Environmental Protection (Chapter 62-340, Florida Administrative Code) or from the top of a seawall, unless a deflector shield, drop spreader, or liquid applicator with a visible and sharply defined edge, is used, in which case a minimum of 3 feet shall be maintained. If more stringent the City of West Miami Code regulations apply, this provision does not relieve the requirement to adhere to the more stringent regulations. Newly planted turf and/or landscape plants may be fertilized in this Zone only for a sixty (60) day period beginning 30 days after planting if need to allow the plants to become well established. Caution shall be used to prevent direct deposition of nutrients into the water.

6. LOW MAINTENANCE ZONES

A voluntary ten (10) foot low maintenance zone is strongly recommended, but not mandated, from any pond, stream, water course, lake, wetland or from the top of a seawall. A swale/berm system is recommended for installation at the landward edge of this low maintenance zone to capture and filter runoff. If more stringent the City of West Miami Code regulations apply, this provision does not relieve the requirement to adhere to the more stringent regulations. No mowed or cut vegetative material may be deposited or left remaining in this zone or deposited in the water. Care should be taken to prevent the over-spray of aquatic weed products in this zone.

7. FERTILIZER CONTENT AND APPLICATION RATES

As such, no additional specific requirements are included for these types of urban turf. The appropriate Best Management Practices listed below must be followed on such sites for nutrient management activities:

These include not to exceed rates recommended in the document titled SL191 *“Recommendations for N, P, K and Mg for Golf Course and Athletic Field Fertilization Based on Mehlich I Extractant”*, and to comply with the recommendations in *“BMP’s for the Enhancement of Environmental Quality on Florida Golf Courses”*, published by the Florida Department of Environmental Protection, dated 2012.

Note that this does not exempt applicators at these sites from the required basic Green Industry BMP training.

(a) Fertilizers applied to turf within the City of West Miami shall be applied in accordance with requirements and directions provided by Rule 5E-1.003, Florida Administrative Code.

(b) Fertilizer containing nitrogen shall not be applied before seeding or sodding a site, and shall not be applied for the first 30 days after seeding or sodding, except when hydro-seeding for temporary or permanent erosion control in an emergency situation (wildfire, etc.), or in accordance with the Stormwater Pollution Prevention Plan for that site.

(c) Nitrogen or phosphorus fertilizer shall not be applied to turf or landscape plants except as provided in (a) above for turf, or in UF/IFAS recommendations for landscape plants, vegetable gardens, and fruit trees and shrubs, unless a soil or tissue deficiency has been verified by an approved test.

(d) Adding a restricted application period: "Fertilizer containing nitrogen or phosphorus shall not be applied to turf or landscape plants during the restricted application period, which is defined as June 1 to September 30." This is a ban aimed at preventing excess nutrient pollution in runoff entering our waterways during our unpredictable South Florida rainy season.

(e) Extending the fertilizer free zone from ten (10) to fifteen (15) feet, which is our recommendation and is also the provision adopted by the City of Miami.

(f) Adding a specific provision for fertilizers containing nitrogen: "Granular fertilizers containing nitrogen applied to turf and/or landscape plants within the city shall contain at least 50 percent slow release, controlled release, timed release, slowly available, or water insoluble nitrogen per guaranteed analysis label. Caution should be used to prevent direct deposition of nutrients in the water." I notice West Miami's proposed ordinance contains a definition of slow release nitrogen, but it is not mentioned anywhere in the ordinance.

(g) Adding a no phosphorus provision: "No fertilizer containing phosphorus shall be applied to turf and/or landscape plants within the city, except where a phosphorus deficiency has been demonstrated in the soil underlying the turf and/or landscape plants by a soil analysis test performed by a State of Florida certified laboratory. Any person who obtains a soil analysis test showing a phosphorus deficiency and who wishes to apply phosphorus to turf and/or landscape plants shall provide a copy of the test results to the city prior to the application of phosphorus."

(h) Adding a penalty provision. I noticed the proposed ordinance includes an enforcement provision which outlines where funds generated by penalties imposed would be allocated, but there is no penalty provision included in the ordinance.

8. APPLICATION PRACTICES

a. Spreader deflector shields are required when fertilizing via rotary (broadcast) spreaders. Deflectors must be positioned such that fertilizer granules are deflected away from all impervious surfaces, fertilizer-free zones and water bodies, including wetlands.

b. Fertilizer shall not be applied, spilled, or otherwise deposited on any impervious surfaces.

c. Any fertilizer applied, spilled, or deposited, either intentionally or accidentally, on any impervious surface shall be immediately and completely removed to the greatest extent practicable.

d. Fertilizer released on an impervious surface must be immediately contained and either legally applied to turf or any other legal site, or returned to the original or other appropriate container.

e. In no case shall fertilizer be washed, swept, or blown off impervious surfaces into stormwater drains, ditches, conveyances, or water bodies.

9. MANAGEMENT OF GRASS CLIPPINGS AND VEGETATIVE MATTER

In no case shall grass clippings, vegetative material, and/or vegetative debris be washed, swept, or blown off into stormwater drains, ditches, conveyances, water bodies, wetlands, or sidewalks or roadways. Any material that is accidentally so deposited shall be immediately removed to the maximum extent practicable.

10. EXEMPTIONS

The provisions set forth above in this Ordinance shall not apply to:

- (a) bona fide farm operations as defined in the Florida Right to Farm Act, Section 823.14 Florida Statutes;
- (b) other properties not subject to or covered under the Florida Right to Farm Act that have pastures used for grazing livestock;
- (c) any lands used for bona fide scientific research, including, but not limited to, research on the effects of fertilizer use on urban stormwater, water quality, agronomics, or horticulture.

11. TRAINING

- (a) All commercial and institutional applicators of fertilizer within the (un)incorporated area of (MUNICIPALITY / COUNTY), shall abide by and successfully complete the six-hour training program in the *"Florida Friendly Best Management Practices for Protection of Water Resources by the Green Industries"* offered by the Florida Department of Environmental Protection through the University of Florida Extension *"Florida-Friendly Landscaping™"* program, or an approved equivalent.
- (b) Private, non-commercial applicators are encouraged to follow the recommendations of the University of Florida IFAS *Florida Yards and Neighborhoods* program when applying fertilizers.

12. LICENSING OF COMMERCIAL APPLICATORS

All commercial applicators of fertilizer within the (un)incorporated area of the City of West Miami, shall have and carry in their possession at all times when applying fertilizer, evidence of certification by the Florida Department of Agriculture and Consumer Services as a Commercial Fertilizer Applicator per 5E-14.117(18) F.A.C.

All businesses applying fertilizer to turf and/or landscape plants (including but not limited to residential lawns, golf courses, commercial properties, and multi-family and condominium properties) must ensure that at least one employee has a *"Florida-Friendly Best Management Practices for Protection of Water Resources by the Green Industries"* training certificate prior to the business owner obtaining a Local Business Tax Certificate. Owners for any category of occupation which may apply any fertilizer to Turf and/or Landscape Plants shall provide proof of completion of the program to the (Municipality/ County) Tax Collector's Office.

13. ENFORCEMENT

Funds generated by penalties imposed under this section shall be used by the City of West Miami for the administration and enforcement of section 403.9337, Florida Statutes, and the corresponding sections of this ordinance, and to further water conservation and nonpoint pollution prevention activities.

14. CONFLICT. All Sections or parts of Sections of the Code of Ordinances, all ordinances or parts of ordinances, and all Resolutions, or parts of Resolutions, in conflict with this Ordinance are repealed to the extent of such conflict.

15. SEVERABILITY. That the provisions of this Ordinance are declared to be severable and if any section, sentence, clause or phrase of this Ordinance shall for any reason be held to be invalid or unconstitutional, such decision shall not affect the validity of the remaining sections, sentences, clauses, and phrases of this Ordinance but they shall remain in effect, it being the legislative intent that this Ordinance shall stand notwithstanding the invalidity of any part.

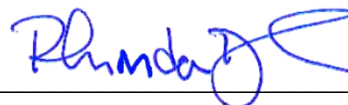

16. INCLUSION IN THE CODE. The provisions of this Ordinance shall become and be made a part of the City Code, that the sections of this Ordinance may be renumbered or relettered to accomplish such intentions, and that the word Ordinance shall be changed to Section or other appropriate word

17. IMPLEMENTATION. The City Manager, City Attorney, and City Clerk are hereby authorized to take such further action as may be needed to implement the purpose and provisions of this Ordinance

18. EFFECTIVE DATE. That this Ordinance shall become effective immediately upon adoption on second reading.

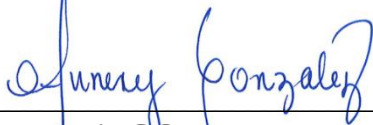

PASSED AND ADOPTED, by the City Commission of the City of West Miami, Florida, in regular session assembled, this 16th day of September, 2020.

APPROVED:

RHONDA A. RODRIGUEZ, MAYOR

ATTEST:

ANNERY GONZALEZ, MMC
CITY CLERK

APPROVED AS TO FORM AND SUFFICIENCY:

JOSE A. VILLALOBOS, CITY ATTORNEY

ROLL CALL VOTE:

Offered by Commissioner Blanes, who moved its adoption. The motion was seconded by Vice-Mayor Diaz-Padron . The vote was as follows:

MAYOR RHONDA A. RODRIGUEZ	<u>Y</u>
VICE-MAYOR ERIC DIAZ-PADRON	<u>Y</u>
COMMISSIONER CANDIDA BLANCA	<u>Y</u>
COMMISSIONER JUAN M. BLANES	<u>Y</u>
COMMISSIONER LUCIANO L. SUAREZ	<u>Absent</u>

Date of 1st Reading: <u>August 19th, 2020</u>
Date of Publication: <u>September 1st, 2020</u>
Date of 2nd Reading: <u>September 16th, 2020</u>
