Chief, as a small operator I do not get discounts. However, my price is all inclusive. You say Sammy do it and this the price you will pay. I take care of everything. Due to distance I hope that your IT people will help with any hardware issues on server. All other issues I can do remotely.

From time of order and deposit it will take two weeks for delivery. Then two to three days on site for installation. Hopefully down time will be limited to Four hours. There will be two people on site from my company doing the installation. We will uninstall all USA software from all local computers and reload with most current USA software. One thing I noticed was all the mismatched USA software. So I have decided to uninstall and reinstall.

Thank You
Sammy
